Any ideas how to do that? A: I recommend you use a library like www.json-generator.com/json.htm to generate the json. You will be able to quickly iterate the data and obtain the desired output. With JavaScript, you can use it like this: `function getData(){ var jsonString = (function () { return "{"+ ""id": 0,"+ ""title": "Cottage", "+ ""type": "Homepage", "+ ""url": "", "+ ""description": "A small mock home page for tests ", "+ ""photo": { "+ ""thumbnail_url": "", "+ ""small_url": "", "+ ""medium_url": "", "+ ""big_url": ""+ " }, "+ ""date_upload": "2010-01-01 12:00:00"+ " }"; 2d92ce491b`
